

SacValley MedShare allows patient healthcare providers to share health information across various healthcare settings.

The benefits to you, as a parent, are:

- You could have less paperwork to fill out.
- The emergency room doctor and care team could access your health history quickly.
- Your doctor could access an accurate list of medications to prevent harmful drug interactions.
- You may avoid duplicate medical tests.
- A new doctor could review your health history before your visit.
- Your doctor could easily access your immunization history.
- Your doctor could be warned of potential allergic reactions.
- Your lab results and radiology reports could be easily accessed among your healthcare providers.
- Specialists you are referred to could have the information they need quickly, easily, and all in one place.
- This community service is free to you, the patient.

The information is safe, the system is HIPAA compliant, and only those providers who need access to the information can do so.

SacValley MedShare is a not-for-profit local health information exchange made possible by the contributions of member organizations.

VISION STATEMENT

To become a model for inclusive provision of health information exchange across our diverse communities that others may build upon to serve similar communities.
