# CaliforniaCare360™ Opted In/Out

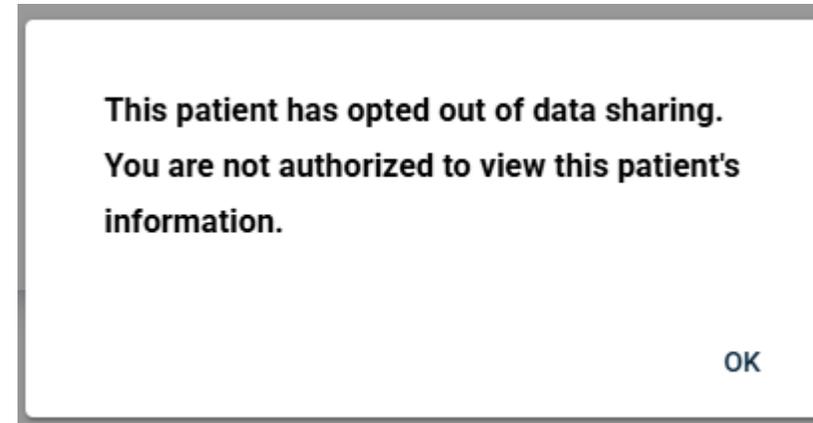

**Opted-in patients:** Select an option from the Purpose attestation dropdown to view the patient record.

A screenshot of a dialog box titled "Patient data access purpose:" with a close button (X) in the top right corner. The dialog contains five radio button options: Treatment, Payment, Administration, Public Health, and System Administration. A "Click to continue" button is located at the bottom right of the dialog.

**Opted-out patients:** Access varies based on your permissions.

If you do not have access to opted-out patient data, you will see a "You are not authorized to view this patient's information" message, and the patient record will not open.

A screenshot of an error message dialog box. The text inside reads: "This patient has opted out of data sharing. You are not authorized to view this patient's information." An "OK" button is located in the bottom right corner of the dialog.

If you have access to opted-out patient data, the patient record will open.

If your role allows access to additional records through Emergency Access, an attestation message will appear when you select a patient outside your permitted organizations.
